no fee

## **NUGENIA Honorary members – membership conditions**

### **Specifications on the Honorary member`s role within NUGENIA**

Groupings (consortia, associations, networks, clusters, platforms, federations, organisations with particular status...) act as representative of a number of different organizations which are not at all, or only some of them, members of the NUGENIA Association.

The status of a NUGENIA Honorary member shall allow having access to the flow of information within NUGENIA as a full member, especially regarding the roadmapping, setting up of priorities and monitoring the project creation process within the open innovation platform. The Honorary member can express on behalf of its members its opinion and interest on activities within NUGENIA and report to them.

If any member of the Honorary member would be interested to propose a new project within the NUGENIA open innovation platform or actively participate on a concrete project preparation with the NUGENIA label, such organization has to become a full NUGENIA member.

To become officially a NUGENIA Honorary member, the organisation has to be invited by the Executive Committee and ratified by the NUGENIA General Assembly.
